

OUR EQUIPMENT

IPM's fleet of heavy equipment allows it to turn around client's project schedules at the least time possible. The company has four (4) strategically located motorpools that enable the deployment of its resources on short notice. Fully supported by an in-house crew of highly skilled and trained technical, maintenance and operations personnel, IPM is practically able to operate round-the-clock, making it a most preferred service provider in major construction and infrastructure projects. Mobile and/or portable fuel stations provided for each of its projects ensure hassle-free refueling operations. No long queues, no unnecessary trips, saving time that make for seamless service delivery.
